

Dear FCC,

I am concerned about broadcasters wanting to silence satellite radio. It is my choice to pay and listen to satellite radio and I am insulted that my right to choose and PAY for what I listen to is threatened by large radio broadcasters and television owners who don't like the idea that there are other choices out there.

I am so tired to the BIG GUYS ganging up on the little guys with their powerful lobbyists trying to dictate what the American people really want. Please reject NAB's petition 04-160. We, the American people need the programming the XM provides. It is our right to listen to what we want!!!!
